**Annexes**

Some certificates from conferences and trainings

## Motivation Letter

Dear Sir and Madam,

I am a student at Middle East Technical University now and during my 2 year education at University I have become a member of many clubs and joined into their activities. I want to join your project 2011-TR-18. I come to there whenever you want. I do sports every day. I like mountain hiking once a week.. I run every morning.. I don't smoke.. I try to learn new things every day..

First of all, I want to describe myself and write about my qualifications to you. I am a member of Middle East Technical University Social Responsibility Student Club. Our Club aim create social people for social communities without prejudice. I been a Youth in Action Project, it name is 'Youth Warm Against Global Warming' it was an action 1.1 Project, we did it with 55 young participants from 7 different countries in Manisa-TURKEY. We searched to solutions Global Warming effects during to 7 days. Our Project partner countries ; Spain , Romania , Bulgaria , Hungary and Germany. I create personal seminars in my university.. I'm led to conferences. I call the have a career in businessman.. I intern an Italian company as part time.. I go for broke to evaluate my time..

As a result, after all these activities I could manage to recognize myself better. I had the opportunity of discovering and improving some qualifications such as communicating and active working ability in a team, entrepreneurship, adjustability in conditions and creativeness. While I was doing all these, I realized how important teamwork was and I perceived the necessity of acting as if it was one body or brain. I understood the importance of being group, not one person.

I joined clubs which organize sports events. And I started to join various branches of sports in a professional manner. I took place tours, exhibition of pictures and any other organizations of civil society organizations. I fulfilled all of these activities as a voluntary work

I think that The European Voluntary Service (EVS) eases our communication with society and encourages our entrepreneurial ability. It also helps to develop our knowledge and claverness. We understand importance of our experiences with The European Voluntary Service programs. it provides to consider our associate value and cultural variety beter

In my opinion, European Volunteer Service provides us to integrate the society easily and to innovate our entrepreneurship. It enables us to gain ability and experiences and understand their values. We can express our sense of solidarity freely in the world. It enables us to understand better the variety of common culture, inheritance and values.

I want to join into European Volunteer Service, because I want to improve my perception of understanding the world by having various experiences while working among the people from different cultures, to contribute the other people and development of the local society which is delivered the service as an active participant, to adjust a new society and to improve the perception of social responsibility by this way.

I want to attend The European Voluntary Service because of various aims and purposes. My basic aims are recognise new friends, attend voluntary programs to help people, and also I will have chance to improve my personal development

For the first time abroad, I will get such an experience would be a pleasure to me when I wake up every morning by myself because I was in a project. This project will motivate me and I do believe to be in service as well as a useful way in front of me and happy people will be able to offer. In every way I need it, you'll be grateful if you accept me I will grateful to you.

What I can give to this project is to make people pleased with my services doing the job with my effort. I will try to make a big difference . Because I know that to love your job causes good things.

We have a project in Turkey( as my Student Club) for Disability.  
If you come to there, this will be very experience for me..  
I am looking forward to waiting your answer.

I hope you will pay attention to my position and my message and you will give me the chance of participating into your program.

I would be grateful to you if I am accepted and given a chance to know all of you

Yours sincerely

Ahmet Çiçek
