EDITORIAL

The Impact of Cochrane Reviews by Dr David Tovey

Research teams who prepare Cochrane Reviews are made up almost entirely of volunteers. The task is onerous, perhaps more so than people who come to this for the first time can imagine, and over time it has become more challenging, as methods aimed at improving internal and external validity advance...

Gelişmiş Tarama

Anahtar kelimenizi/ kelimelerinizi yazıp tarama yapacağınız alanı belirleyin.

- Taramanızı yaparken anahtar sözcükleri AND, OR, ya da NOT bağlaçlarından biriyle bağlayabilirsiniz.
- Anahtar sözcüğün türevlerini de taramak istiyorsanız; Sözcüğün kök bölümünü yazarak, başına ya da sonuna * İmlecini ekleyebilirsiniz.
- Anahtar sözcüğün yazılışından emin değilseniz; ? imlecini; Sözcüğün başında, ortasında ya da sonunda kullanabilirsiniz.

Tarama stratejileri hakkında daha detaylı bilgi bulabilirsiniz.

SEARCH TIPS

Tip No. 1:

Boolean operators AND, OR, and NOT can be selected from the pulldown selection boxes or entered directly within the search text boxes. Use parentheses to separate components when entering complex search directly in text box with mixed Boolean operators.

Example: (colchicine AND liver) AND (fibrosis OR cirrhosis)

Tip No. 2:

The AND operator is used by default between search terms. The string *brain stem* will match records where both words are included in any order or proximity. Search for exact phrases by enclosing a string in quotation marks.

Example: "clodronate therapy" matches that exact term
